GRDA shape rule

Six consecutive waves give five neighboring comparisons.

Chosen cutoff: every shape correlation >=0.90.

Shapes are normalized for duration and amplitude.

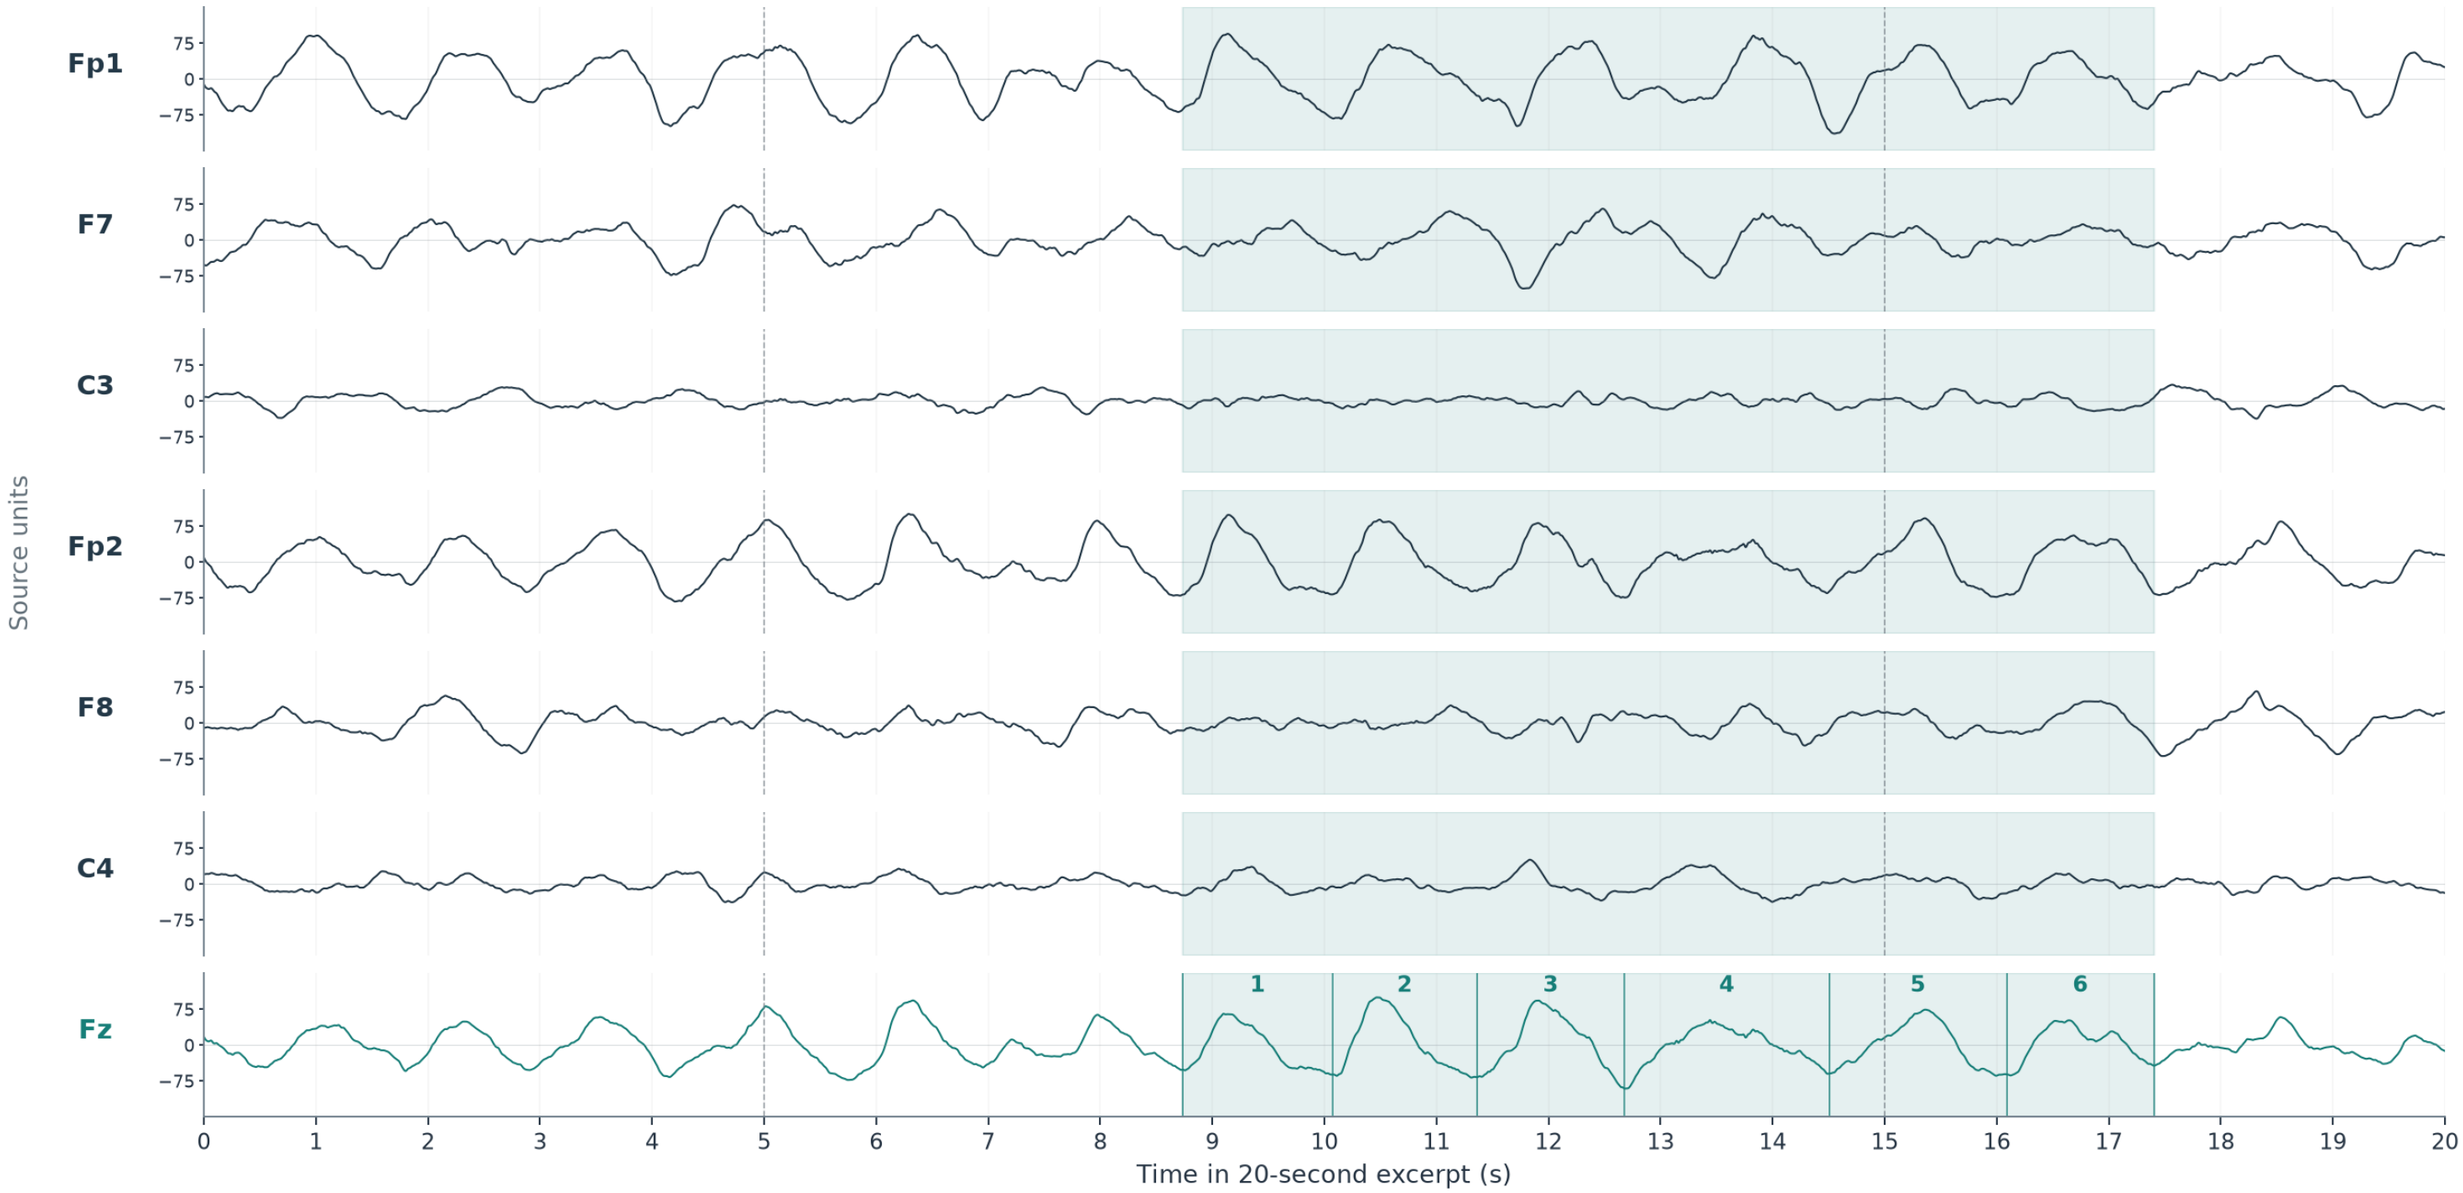

Labels show the visual ratings of the highlighted runs.

Original pilot also used >=75 microvolts and a timing rule. The GRDA amplitude cutoff was later removed.

RUN-01 | Shape review

Good GRDA

Fz-CAR | minimum adjacent r = 0.705 | fails cutoff 0.90

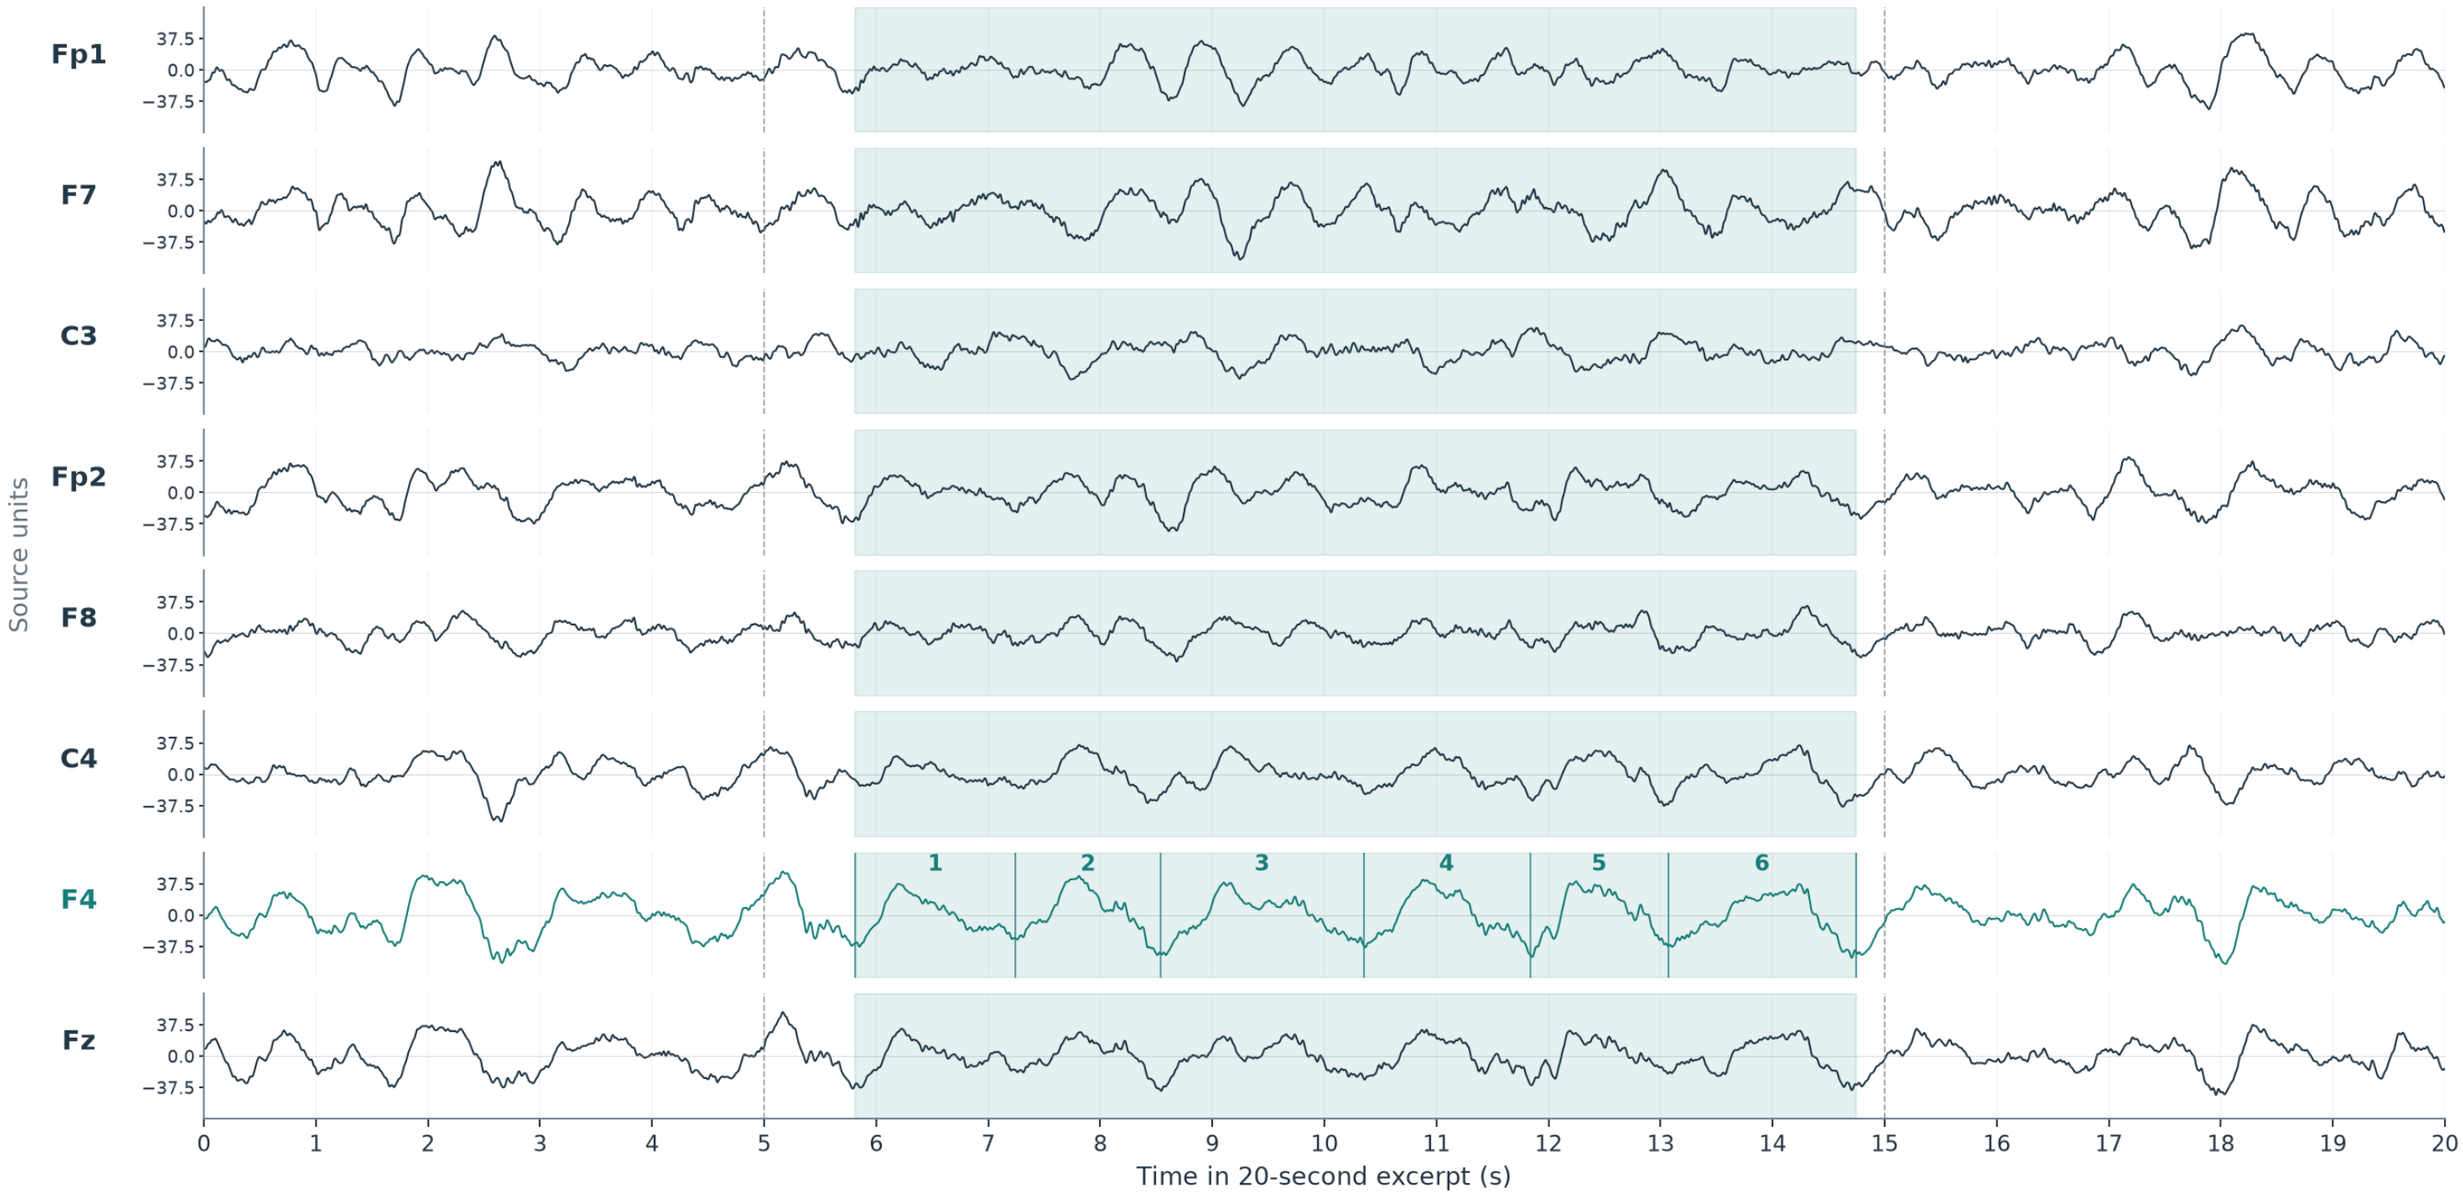

Shading: six-wave run. Dashed: scored 10 s (MORGOTH 0.9834).

CAR | EEG 0.5-30 Hz | Troughs 0.5-4 Hz | Labels: visual review

RUN-02 | Shape review

Bad GRDA

F4-CAR | minimum adjacent r = 0.709 | fails cutoff 0.90

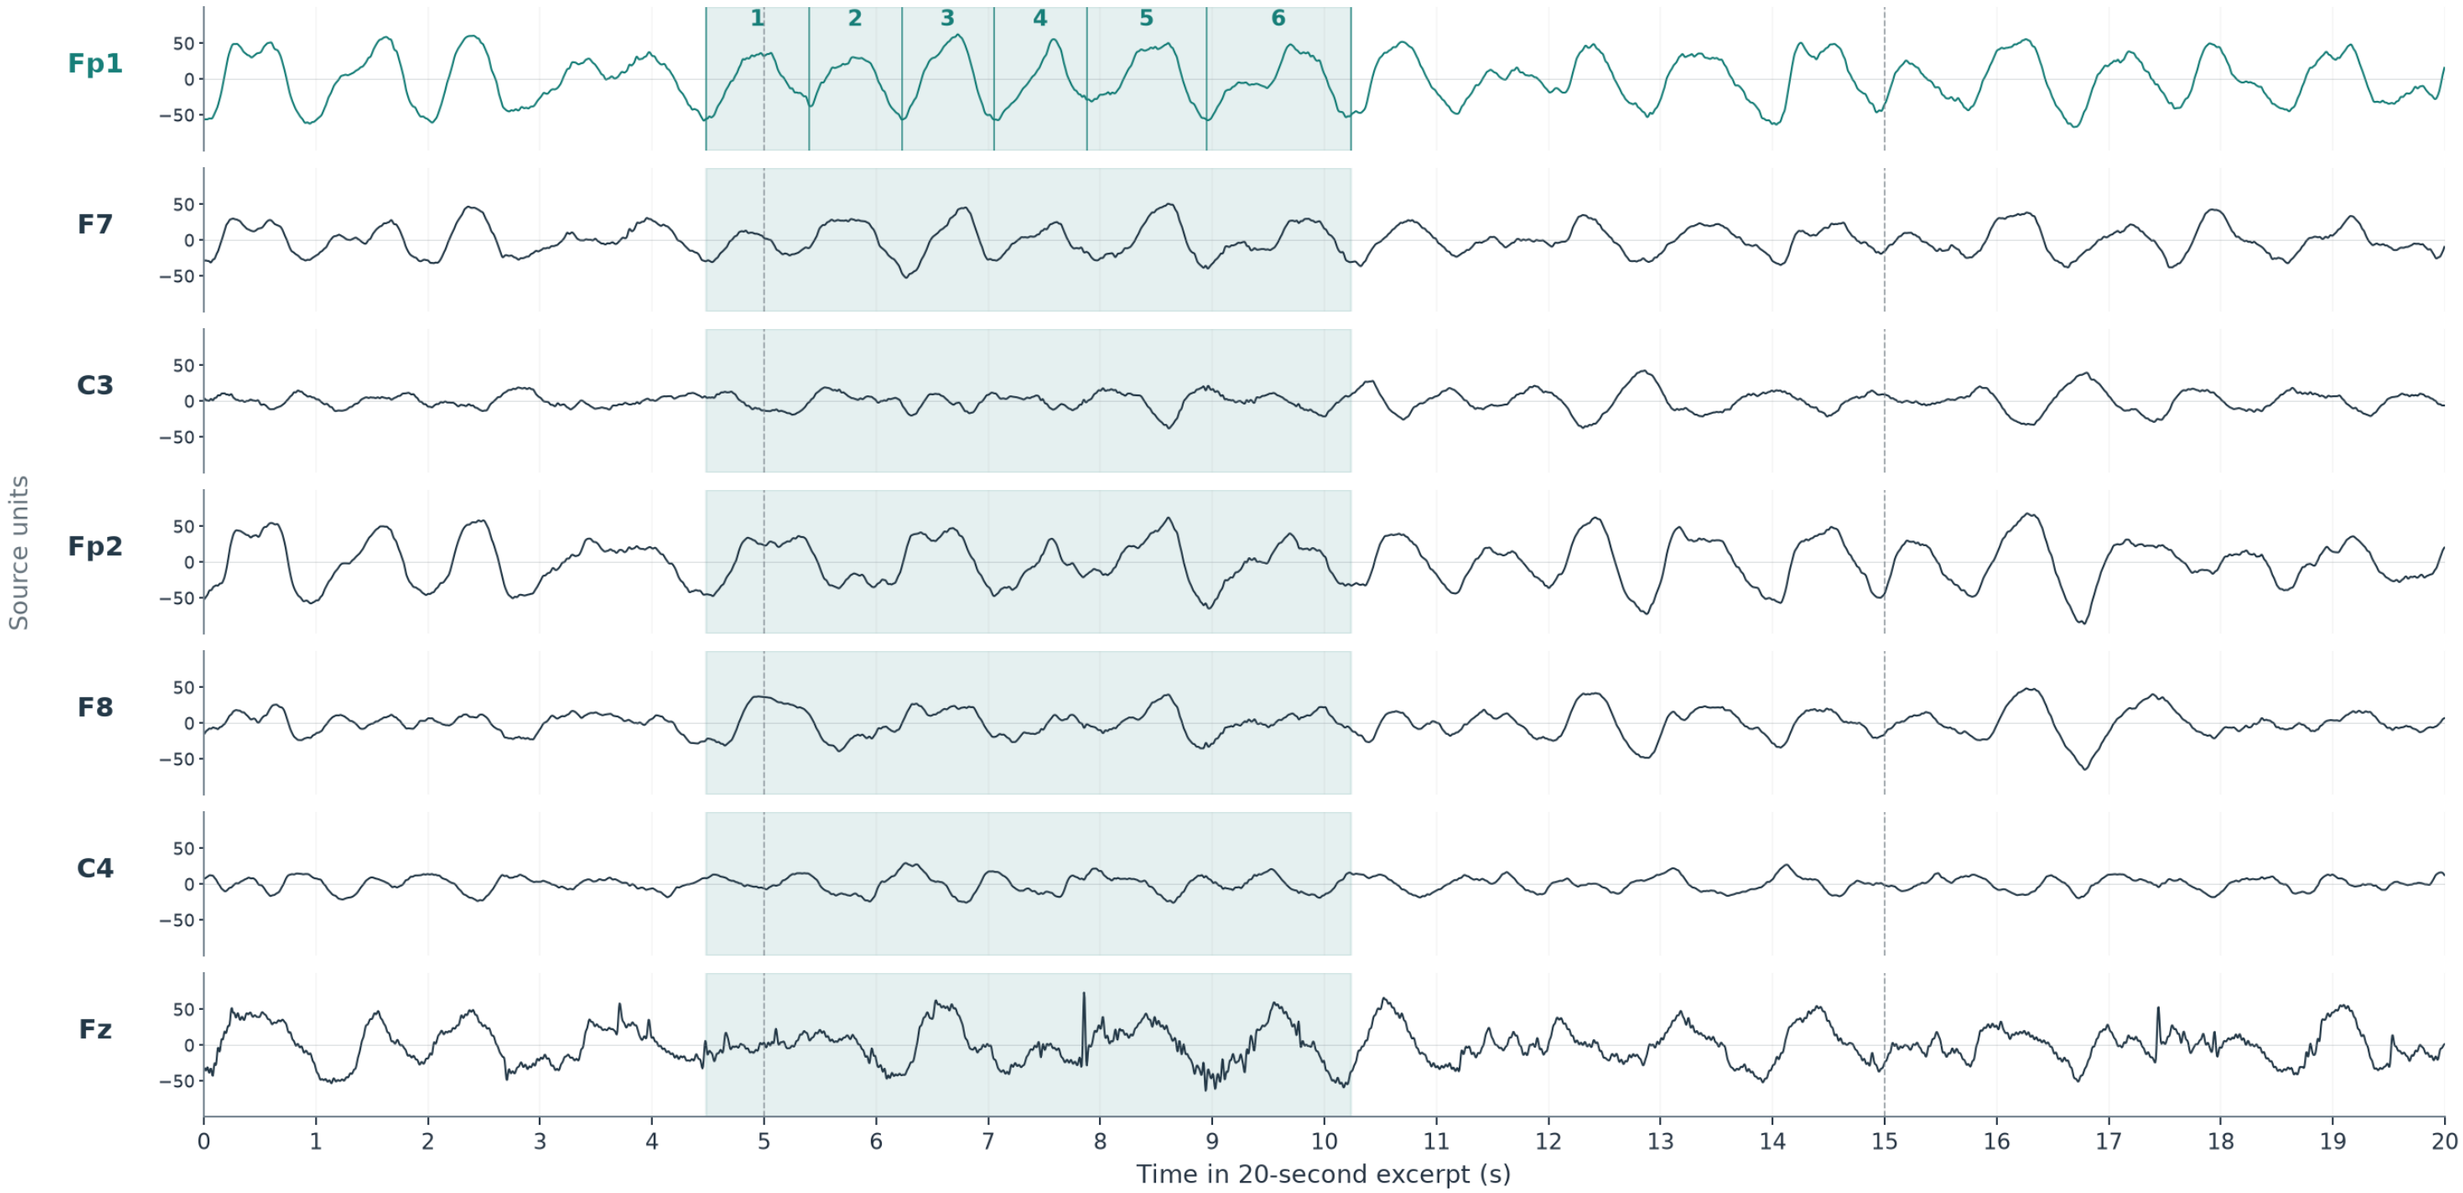

Shading: six-wave run. Dashed: scored 10 s (MORGOTH 0.9595).

CAR | EEG 0.5-30 Hz | Troughs 0.5-4 Hz | Labels: visual review

RUN-03 | Shape review

Good GRDA

Fp1-CAR | minimum adjacent r = 0.847 | fails cutoff 0.90

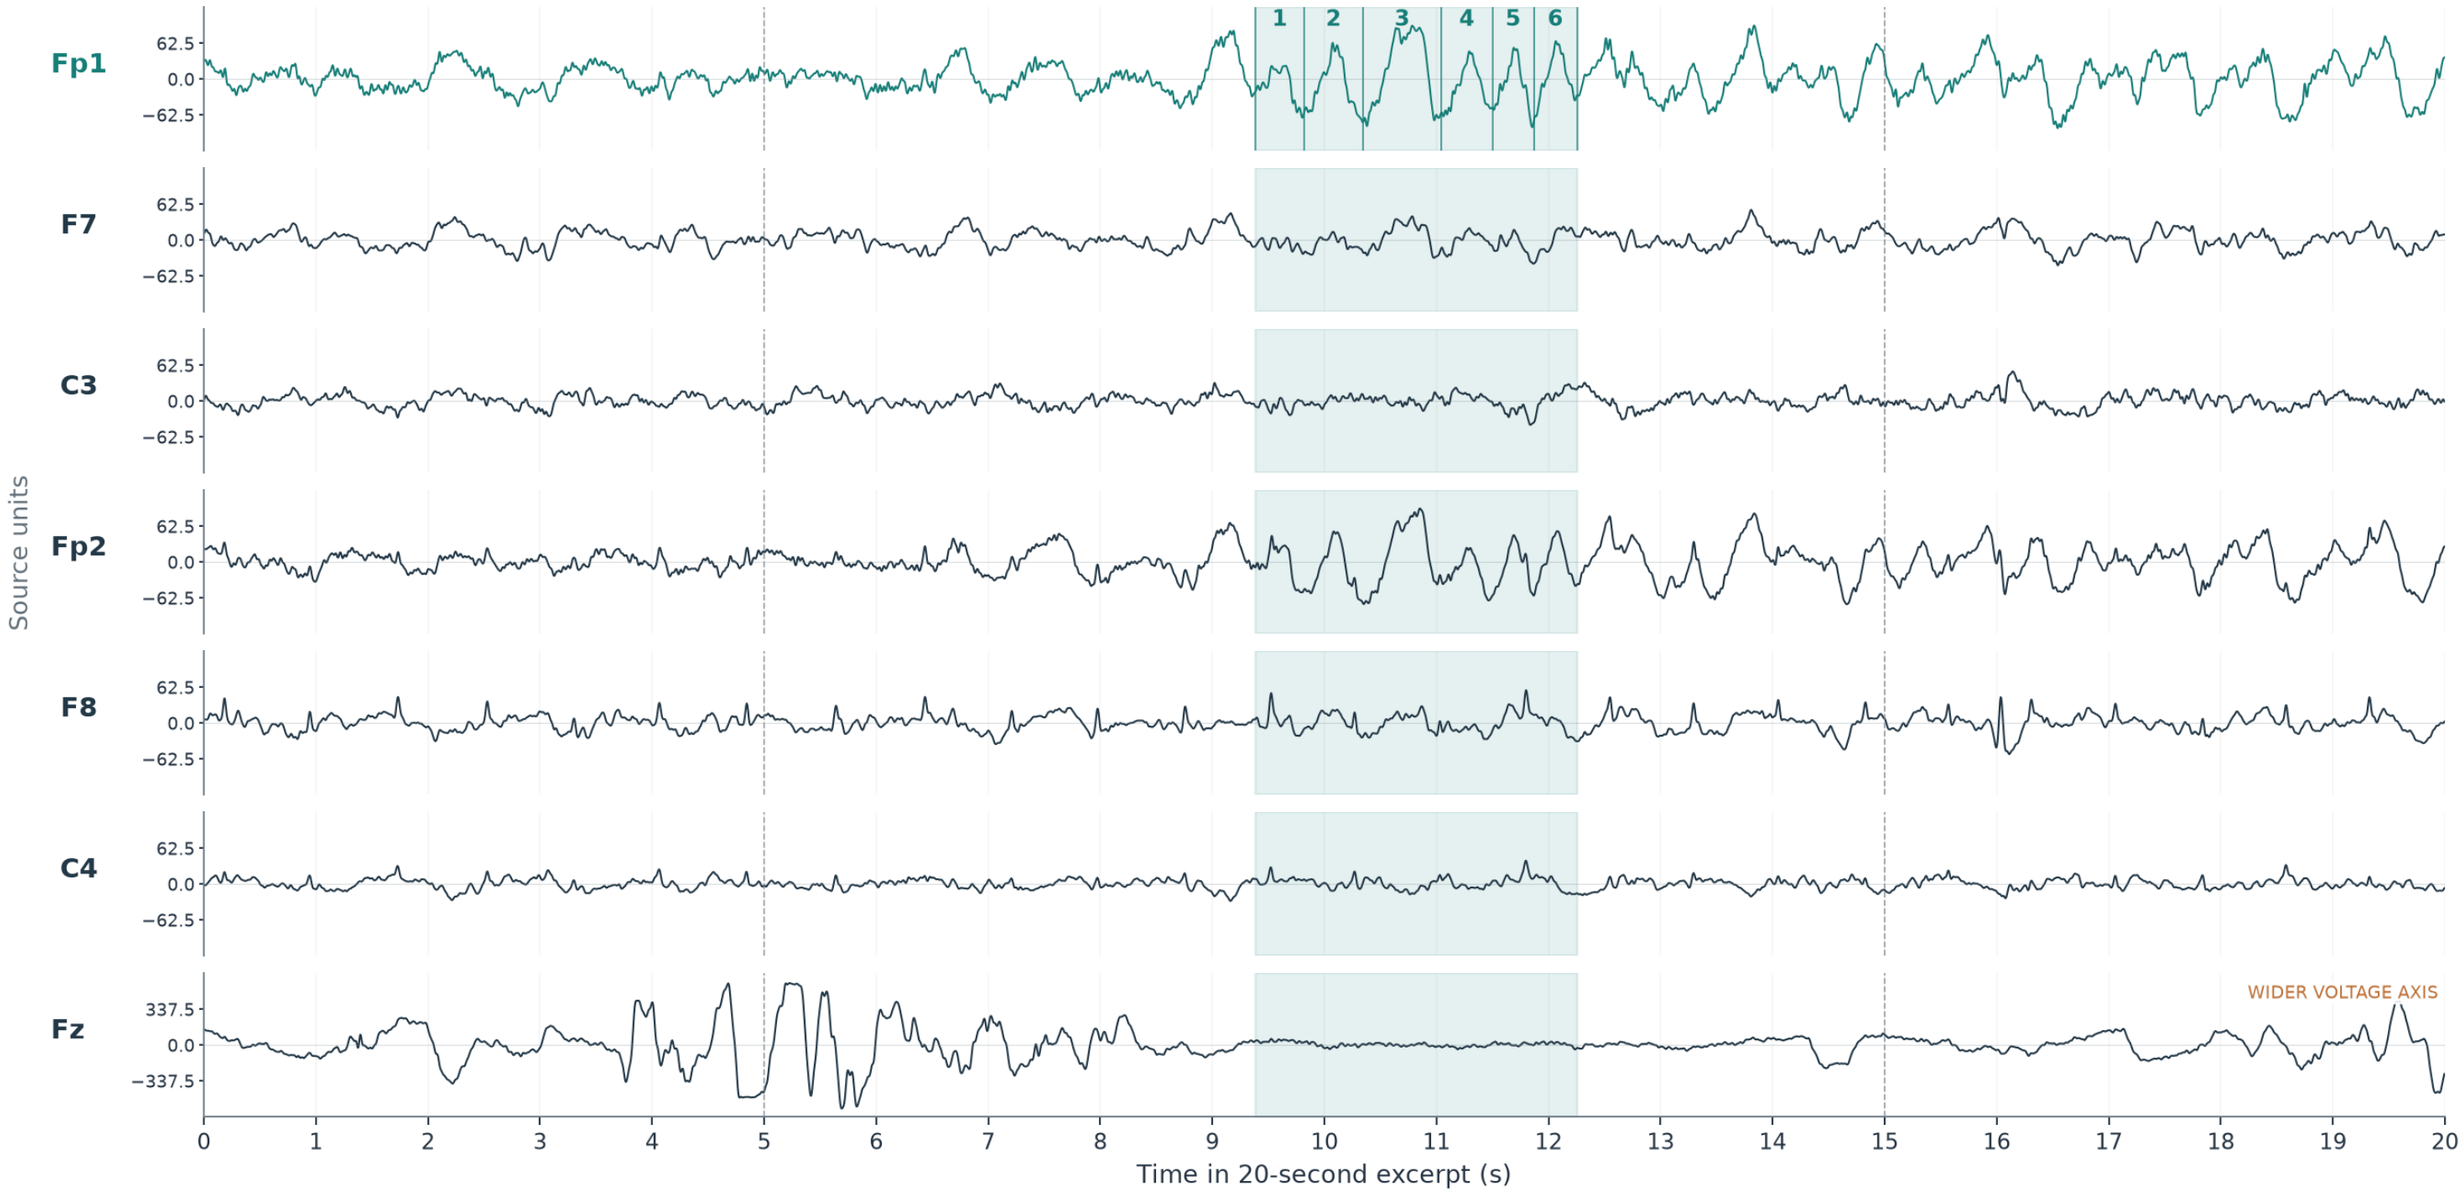

Shading: six-wave run. Dashed: scored 10 s (MORGOTH 0.9960).

CAR | EEG 0.5-30 Hz | Troughs 0.5-4 Hz | Labels: visual review

RUN-04 | Shape review

Borderline / poor

Fp1-CAR | minimum adjacent r = 0.814 | fails cutoff 0.90

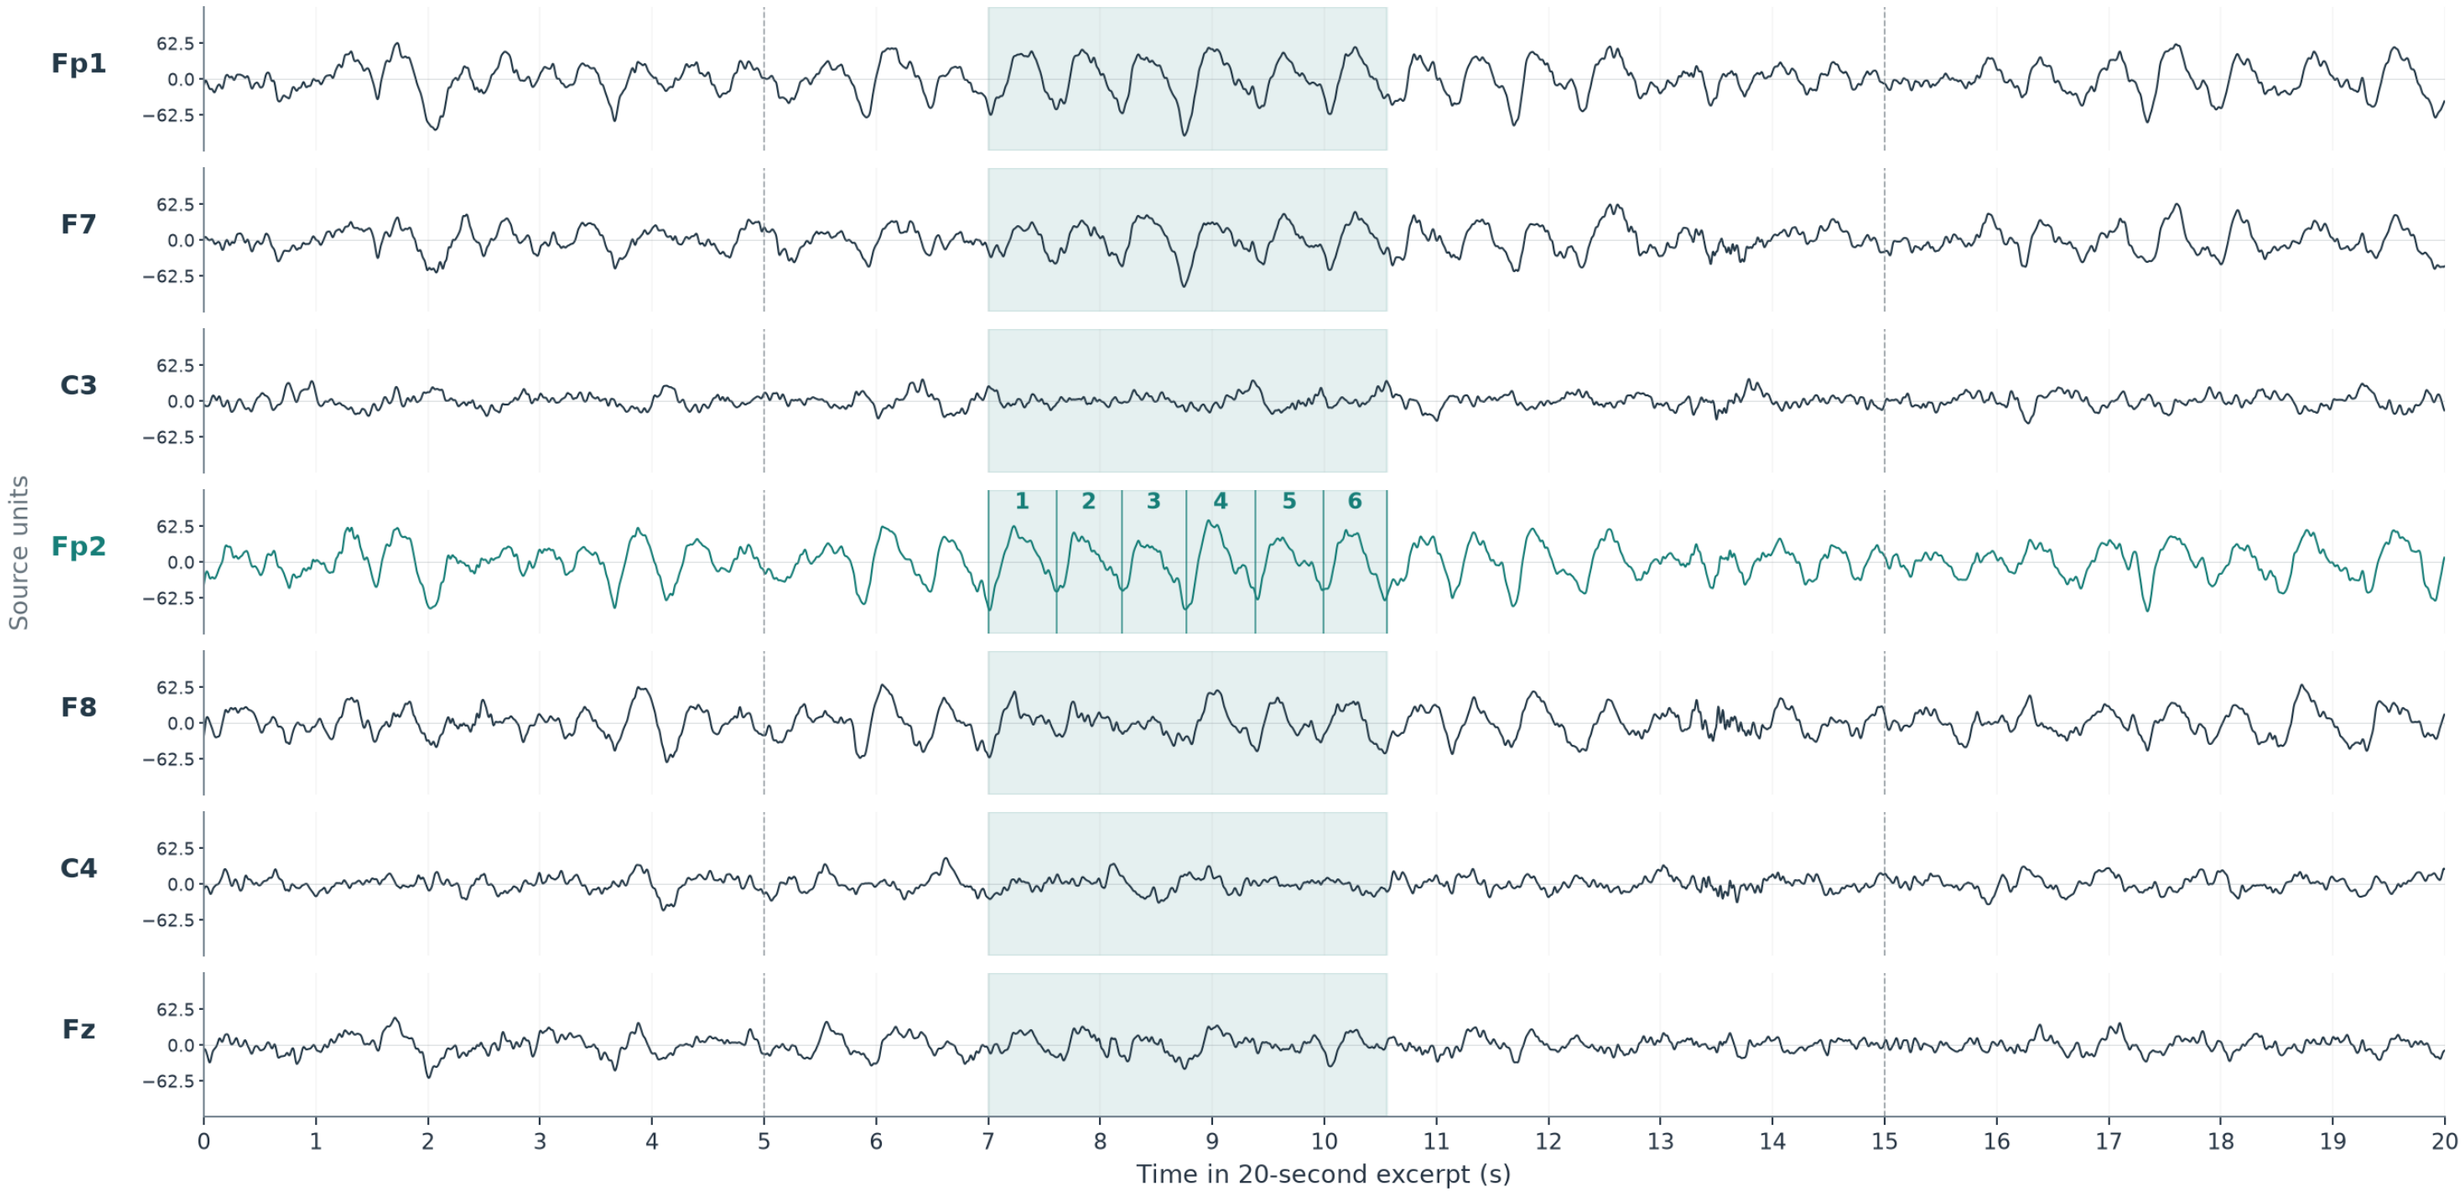

Shading: six-wave run. Dashed: scored 10 s (MORGOTH 0.9860).

CAR | EEG 0.5-30 Hz | Troughs 0.5-4 Hz | Labels: visual review

RUN-05 | Shape review

Excellent GRDA

Fp2-CAR | minimum adjacent r = 0.901 | passes cutoff 0.90

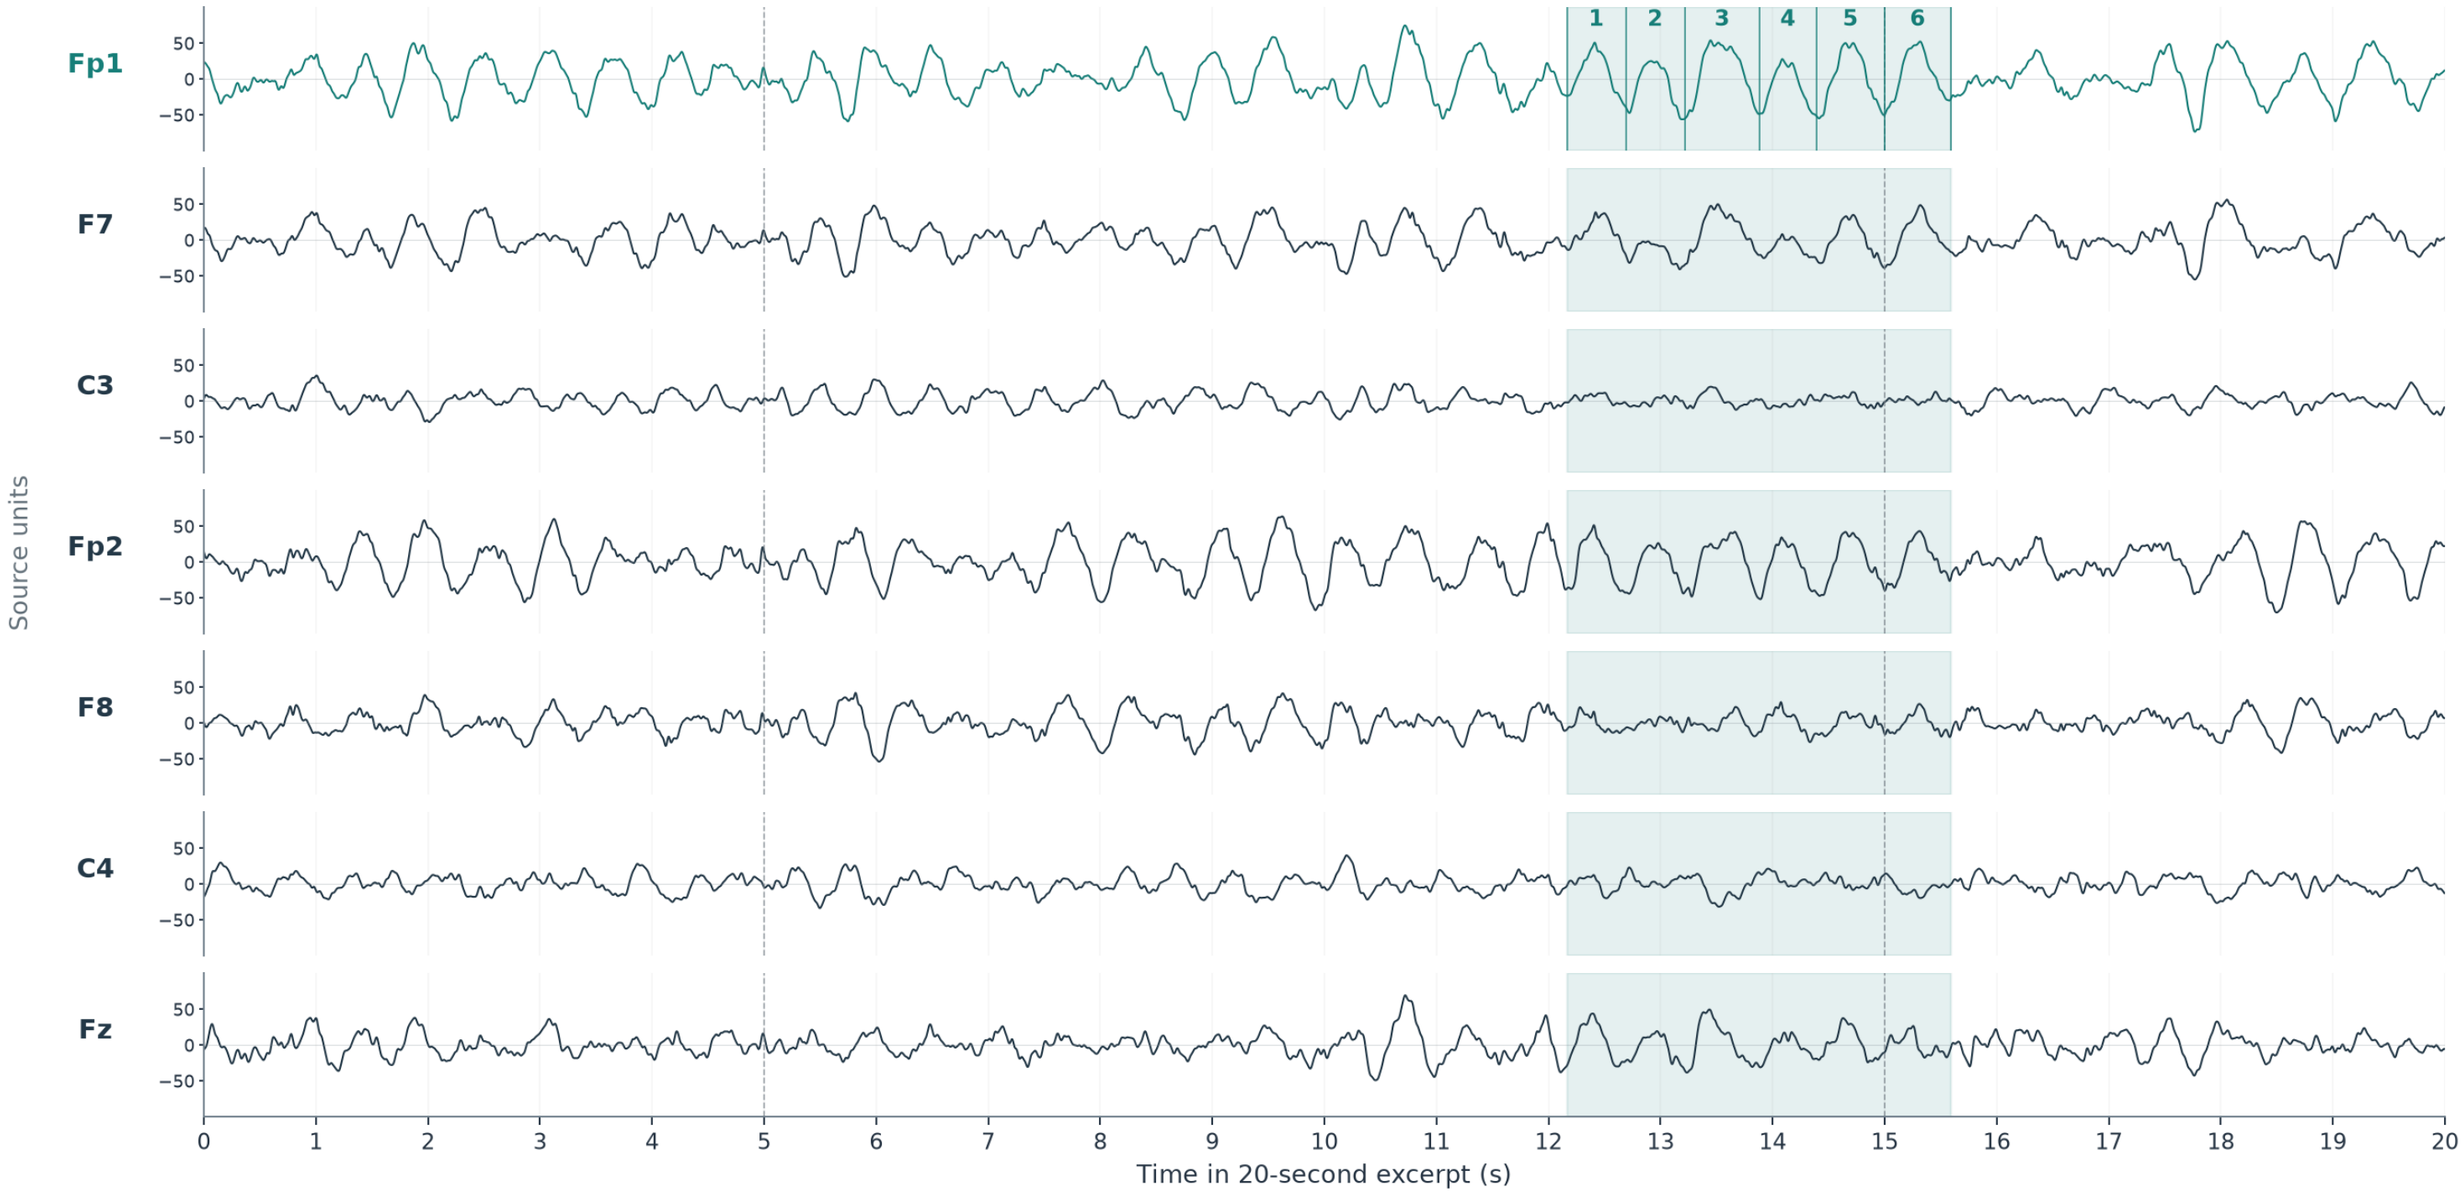

Shading: six-wave run. Dashed: scored 10 s (MORGOTH 0.9844).

CAR | EEG 0.5-30 Hz | Troughs 0.5-4 Hz | Labels: visual review

RUN-06 | Shape review

Excellent GRDA

Fp1-CAR | minimum adjacent r = 0.948 | passes cutoff 0.90

Shading: six-wave run. Dashed: scored 10 s (MORGOTH 0.9688).

CAR | EEG 0.5-30 Hz | Troughs 0.5-4 Hz | Labels: visual review
