GRDA without an amplitude cutoff

Six consecutive waves; every neighboring shape r >=0.90.

At least 3/5 duration changes <50%; each wave 0.25-2 s.

No voltage minimum.

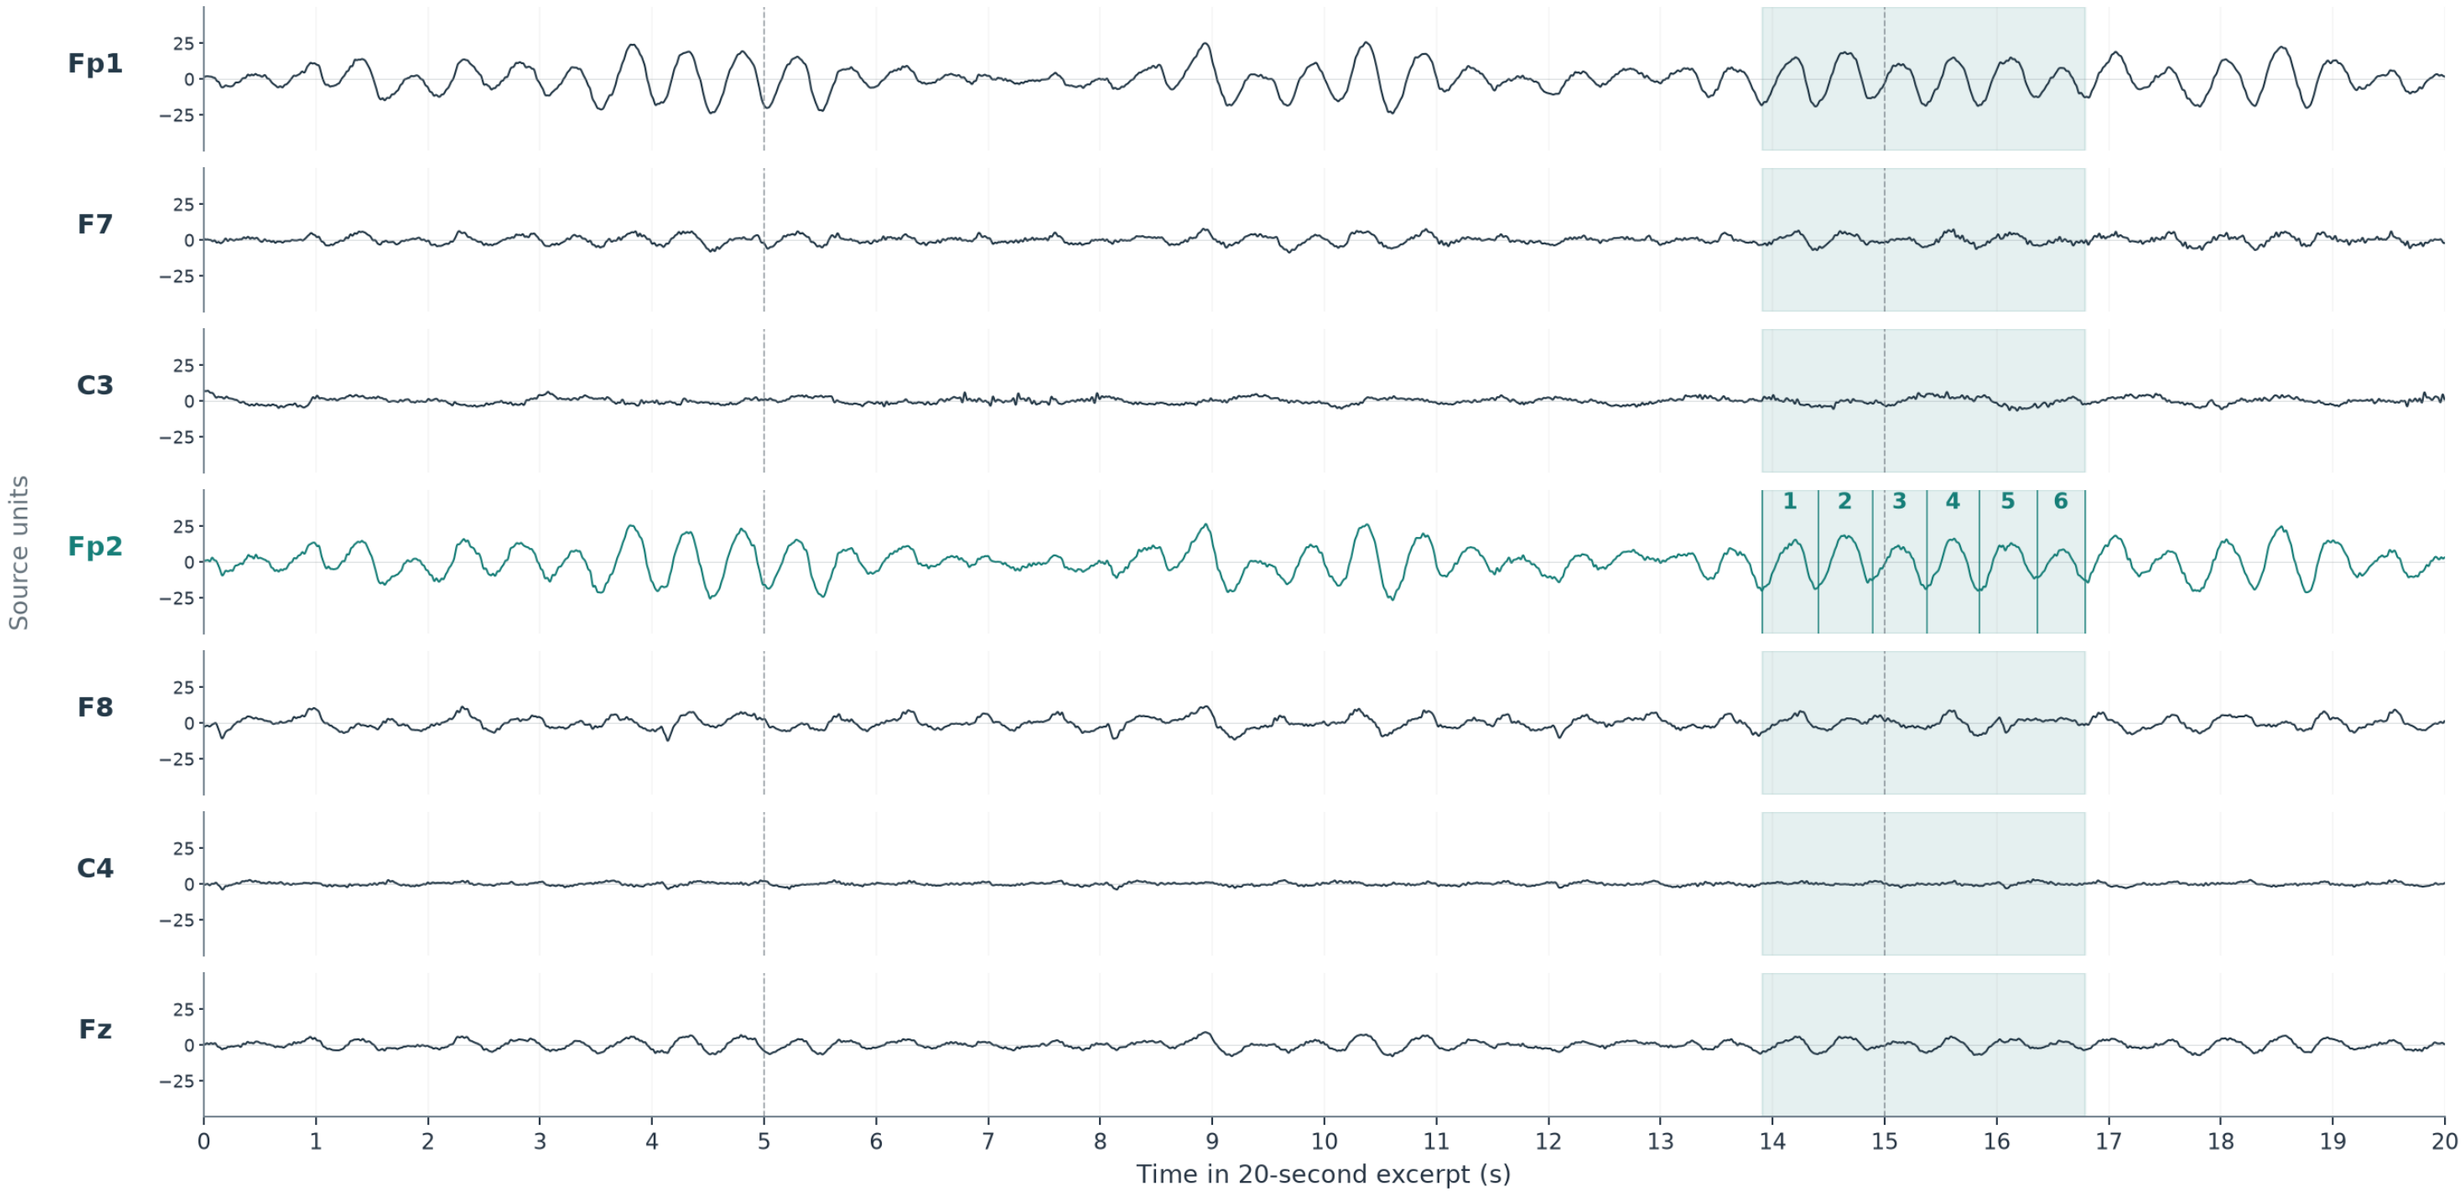

Do the highlighted runs look like GRDA?

Labels record visual ratings. Shading marks the six-wave run under review.

LOW-01 | No amplitude cutoff

Good GRDA

Fp2-CAR | minimum adjacent r = 0.933 | timing 5/5

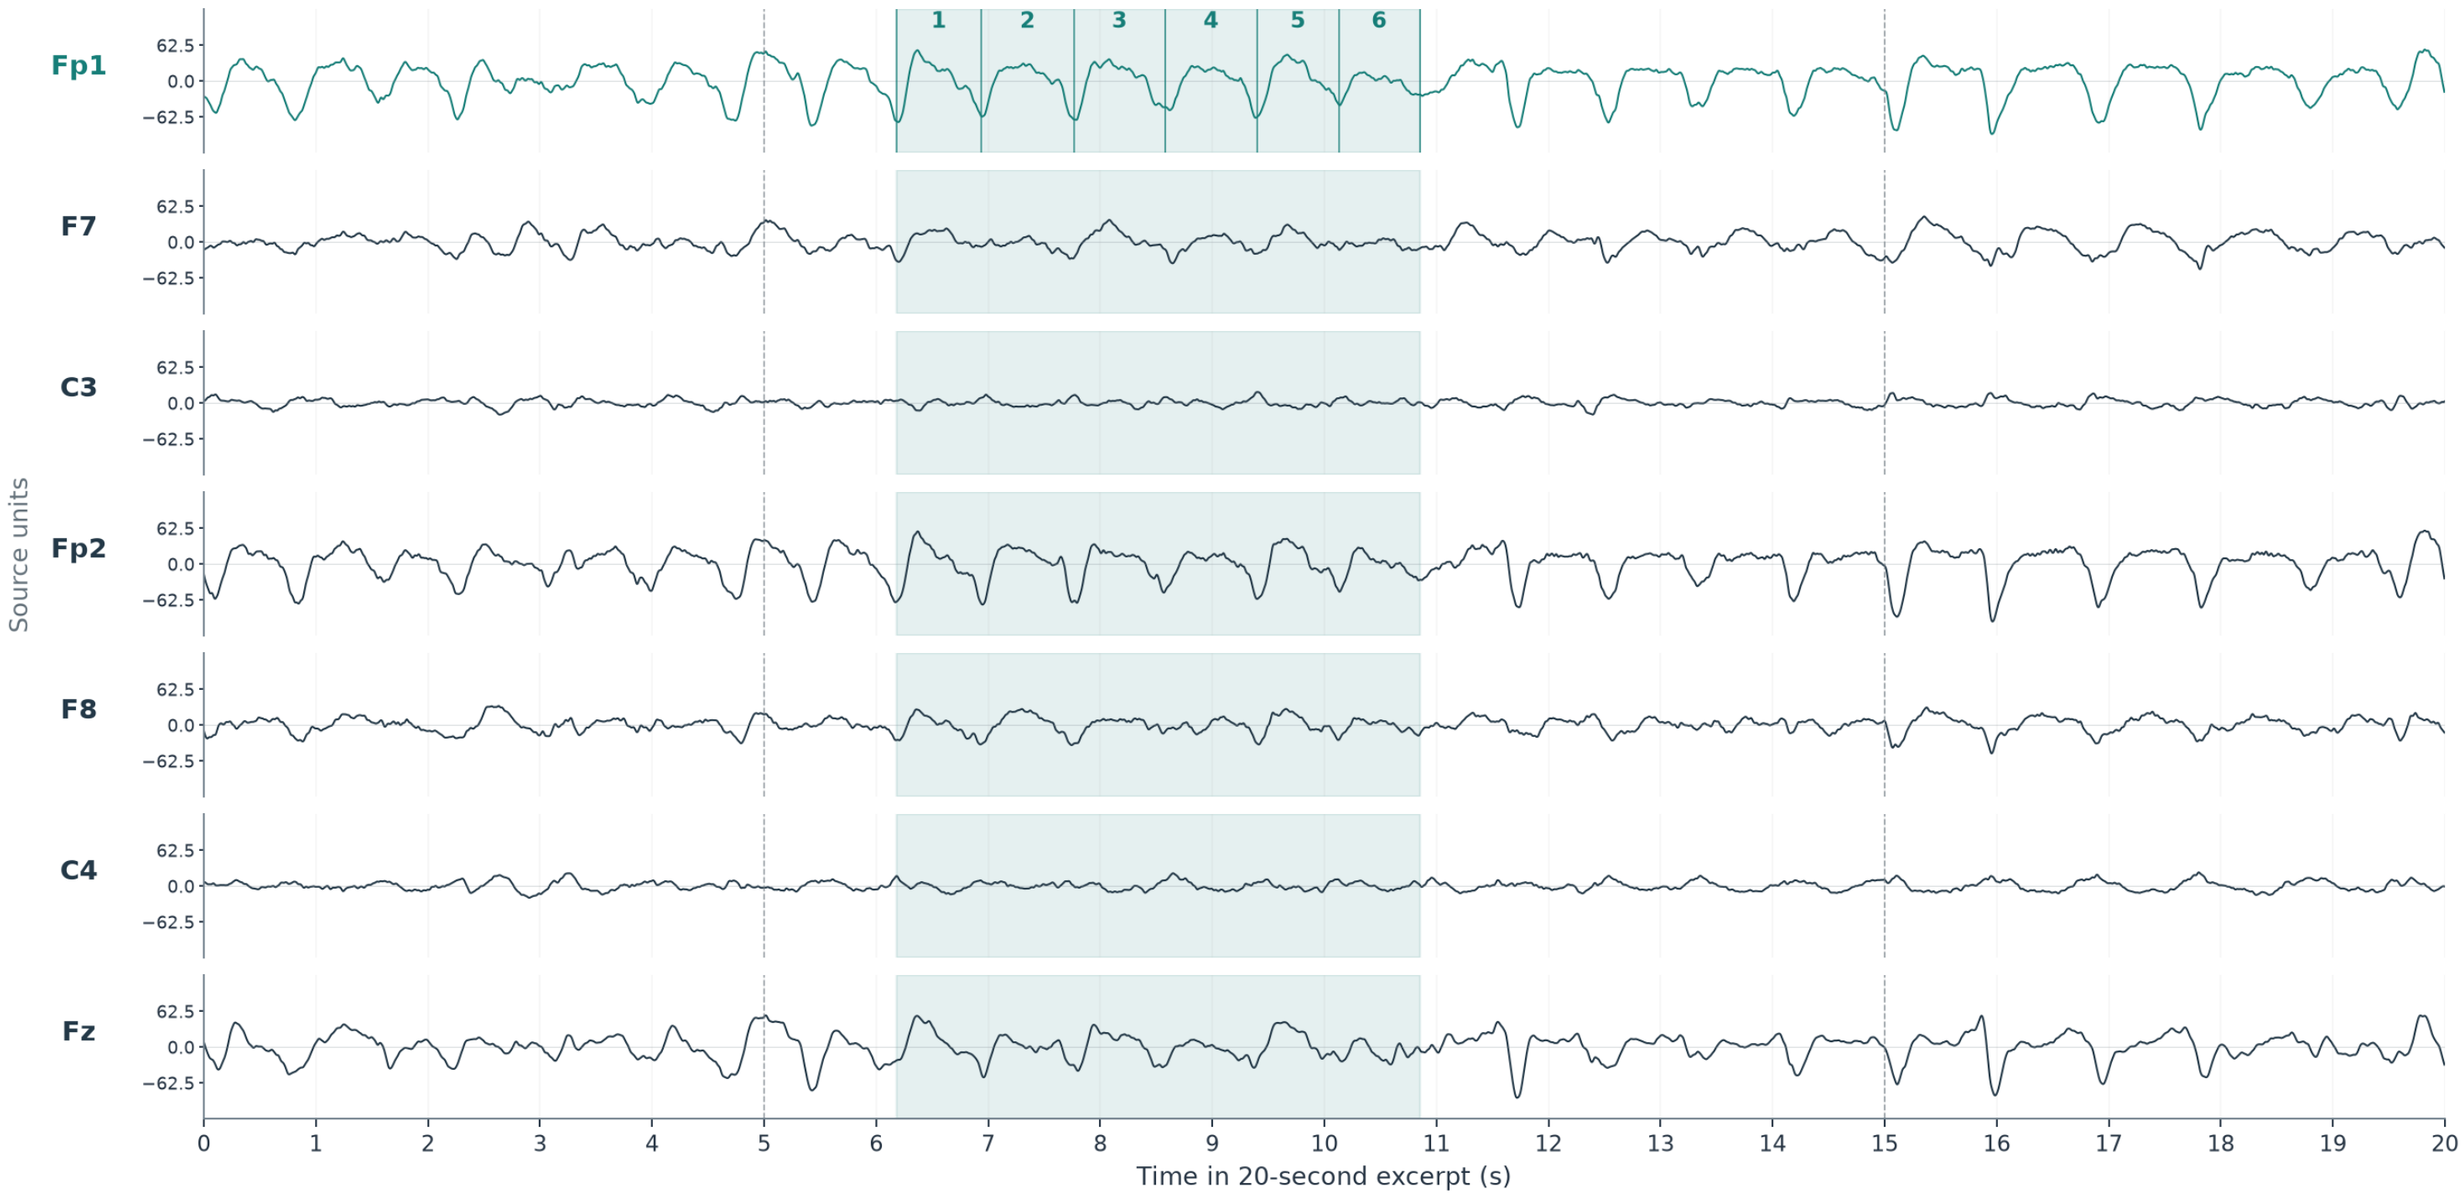

Shading: six-wave run. Dashed: scored 10 s (MORGOTH 0.9546).
